About

GREENFIELD
Finishing
LLC

MANUFACTURER AND SUPPLIER OF
STANDARD & SPECIALTY INTERIOR
WOOD DOORS & TRIM

Established in 1997, our journey began as we proudly finalized our inaugural trim & door package for a contractor. Prior to this venture, our focus was on crafting & selling both indoor & outdoor furniture. It was a friend who recognized our skills & suggested the idea of establishing a custom finishing company. Accompanying him, we explored local builders, contractors, & millwork shops, gathering inspiration, & from that moment forward, there was no turning back!

In 2021, we expanded our family legacy by acquiring my father's door business, King Doors.

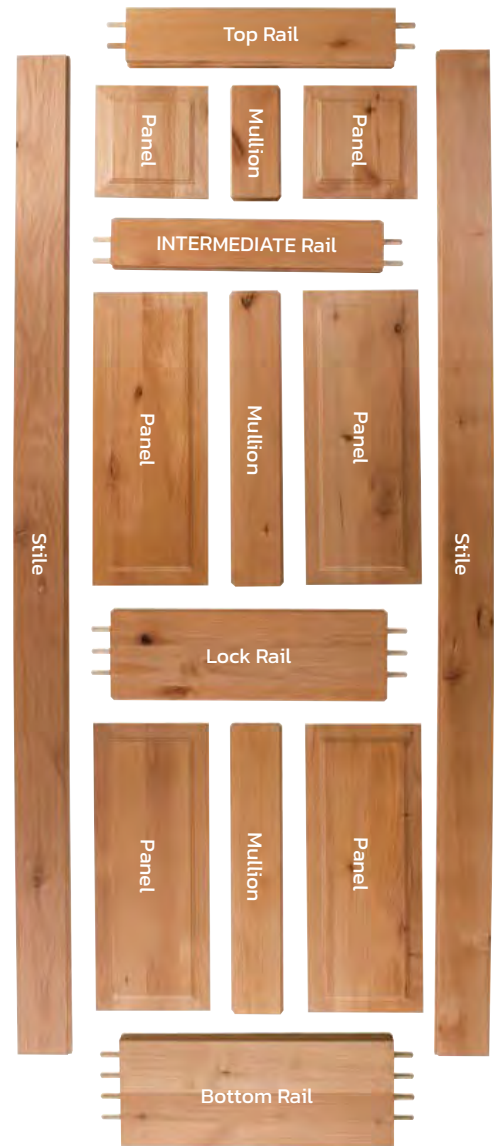

We specialize in delivering exquisite custom finishing, with a keen focus on quality & integrity. We offer a diverse range of door species & styles, including the option for custom designs. From painting & staining to pre-hanging & installation, we provide a full trim & interior door service, catering to every aspect of the process.

Today, Greenfield Finishing is a family-oriented business, & continues to thrive under the daily operation of Abner King & his sons, Dave and Elam.

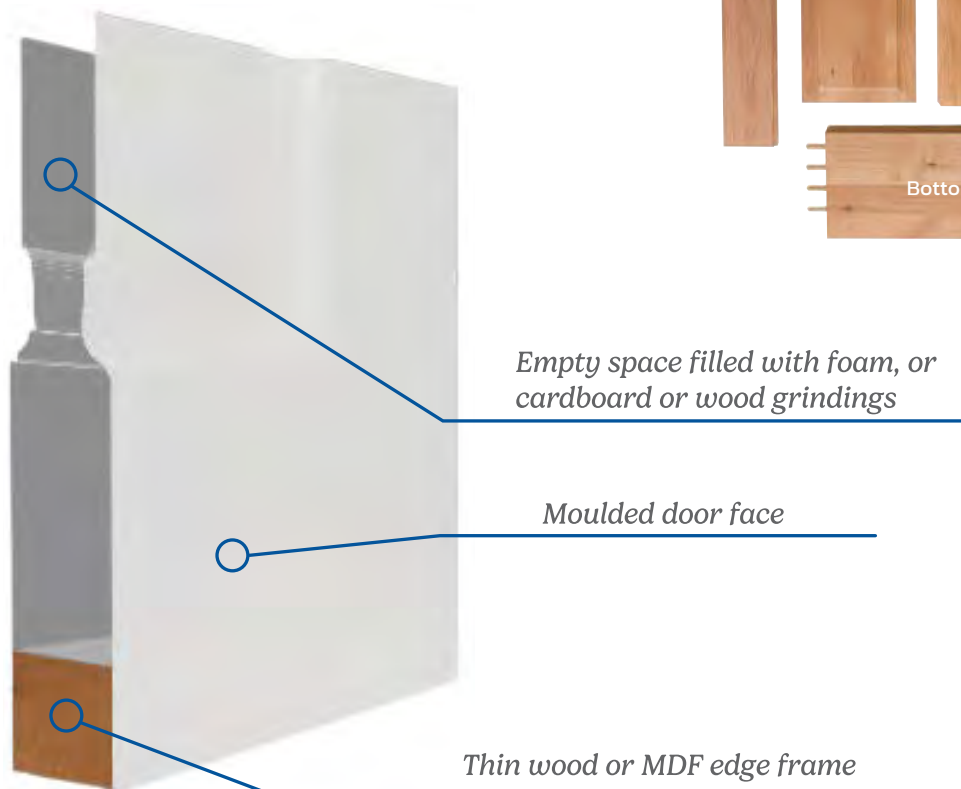

Know Your Door

Stile & Rail Door -- our stock doors are stile & rail doors which are constructed from horizontal rails and vertical stiles with panels in between. Core and panel type varies by series and manufacturer.

Our area has several small wood shops that produce some of the finest-built hardwood furniture and handcrafted doors, and we are fortunate to be able to utilize products from those manufactures.

MOLDED DOOR

ROUTER CARVED

Premium Router Carved MDF Doors with Over 150 Designs Offered

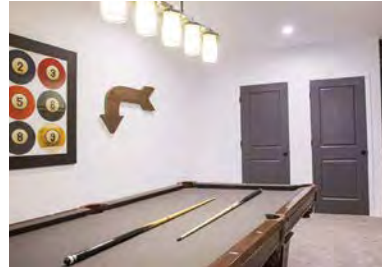

Woodgrain's Router Carved Door Collection is made of medium density fiberboard (MDF) and include both 1 3/8" and 1 3/4" thick doors available. Router Carved doors offer infinite design options by combining cutting edge technology and old-fashioned craftsmanship.

Door Specifications

Heights: 6'8", 7'0", 7'6", 8'0" | Width: 1'0" - 4'0"

Thickness: 1 3/8", 1 3/4" | Bifold Doors Available

 20-, 60-, and 90- Minute Fire Doors Available.

Features & Benefits

-  Made in the USA
-  40% Lighter
-  Smooth Paintable Finish
-  Timeless Styles
-  Precision Carved
-  >800 lb Screw Hold Capacity

Design Collection MDF Door Offers

- Exceptionally smooth surface for excellent paint adhesion
- Unlimited design options, including most graphics and text
- Resists shrinkage, expansion or warping
- Environmentally friendly
- SureEdge design for superior screw holding capacity.

Design Collection MDF Door with Expanded Polystyrene (EPS) Core Offer Several Advantages

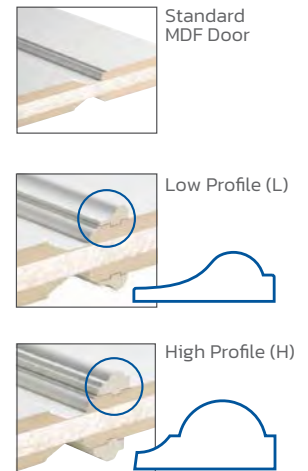

- 40% lighter than the standard 2'6" x 6'8" MDF door
- Easier to handle and hang
- Exerts less stress on the hinges
- Improve sound transmission properties

Profile and Panel Options

Mix and match any of our five profile options or two raised moulding options.

Raised Moulding

SureEdge

SureEdge solid wood edge band is a feature in each MDF door. Installed in each stile, the SureEdge system allows maximum screw holding power and ease of hinge mortising.

SureEdge

Glossary

Our "elite" series interior doors are hand-sanded for cross grain marks and also have a formaldehyde free core. Every stile and rail is joined with dowels and glues. The Elite series doors have many features that set them above the competition.

Rustic Series are solid wood doors in Knotty Pine and Knotty Alder. The wood species tends to be a softer wood in which will have imperfections that you will not see in the Elite Series doors. These characteristics might include small dings and dents, small splits or scratches. This is the nature of the Rustic Series, a production run door at an affordable price point.

A pinnacle of craftsmanship in interior doors. Our Exclusive Series features the Flush Foam Core doors, built to our specifications to provide our customers with a superior quality flush door. Available in Oak and Maple options, these doors boast a distinctive combination of elegance and functionality.

These doors offer a practical solution with low maintenance for effortless cleaning. The Economy Grade doors are crafted with a keen focus on delivering a balance between cost-effectiveness and visual appeal.

White Oak

A hard and heavy wood with a medium-bending and crushing strength, low in stiffness, but very good in steam-bending. Hardwood is light to medium brown. The sapwood is light-colored and the heartwood is light-to-dark brown. White oak is mostly straight-grained with a medium-to-coarse texture. Having longer rays than red oak, white oak has more figure.

2-Panel Flat Panel
Shaker

White Oak 4102 2-Panel Shaker + Bravura 904s-1 Lever in Oil Rubbed Bronze

For more White Oak door options see Quick Ship section, page 30

Red Oak

The sapwood of red oak is white to light brown and the heartwood is a pinkish-reddish brown. The wood is similar in general appearance to white oak, but with a slightly less-pronounced figure due to the smaller rays. The wood is mostly straight-grained, with a coarse texture.

Poplar

The sapwood is creamy white and may be streaked, and the heartwood varies from pale yellowish-brown to olive green. The green color in the heartwood will tend to darken on exposure to light and turn brown. The wood has a medium-to-fine texture and is straight-grained.

Knotty Alder

Knotty Alder grows in the Pacific Northwest and is a medium density hardwood with an even grain appearance. The wood is normally light brown with hues of red or peach. Its softer nature makes it easy to machine and receptive to a variety of stains and finishes.

Flush Foam Core

Our Flush Foam Core doors are built to our specs to give our customers a better quality flush door. Available in Oak & Maple. With a MDF back plywood skin these doors give you a more consistent finish quality. The Foam Core makes the door lighter than a Solid Core but has a better sound deadening rating than Hollow Core.

A hard and heavy wood with a medium-bending and crushing strength, low in stiffness, but very good in steam-bending. Mostly straight-grained with a medium-to-coarse texture. Having longer rays than red oak, white oak has more figure.

WHITE OAK

The sapwood is light-colored while the heartwood is light-to-dark brown.

Molded

Molded doors are an economical option for interior doors. They are stamped by a mold into a hardboard fiber material to create the door desired panel design. They are manufactured to resemble the look of an interior stile and rail wood doors. Each door model has a specific panel type, sticking type, and surface. Unlike our stile and rail primed doors molded doors do not have stile and rail intersections and therefore create a nicer finished product. Another option is Woodgrains Router Carved Door, see our custom door section.

SWISS HERITAGE SERIES

Swiss Heritage Series

The Swiss Heritage Series doors are locally manufactured by Amish craftsmen.

These doors are made in a stile & rail build. Because these doors are solid wood stave core, you get your choice of any native hardwood specie. Door thickness is 1 3/8" standard, with options up to 2 1/4" thick. Panels are 3/4" thick, made of solid wood and also available up to 1 1/4" thick. The door has better stability when using stave core versus using a solid piece of hardwood for stiles and rails.

Doors are pre-hung on matching solid wood specie of your choice, with plenty of different hinge and hardware options to choose from.

Pocket Door Locks

Pocket door locks are an excellent choice to purchase due to their practicality, space-saving benefits, and aesthetic appeal. Designed specifically for pocket doors, these locks are discreet and seamlessly integrated, allowing doors to slide smoothly into wall cavities when opened. This unique mechanism maximizes usable space by eliminating the need for swing clearance associated with traditional doors. Pocket door locks provide privacy and security, ensuring that rooms can be easily separated when needed.
